PROFILE SUMMARY

AI Data Science graduate with hands-on experience building LLM pipelines, NLP systems, and cloud-native ML infrastructure. Google Cloud Associate Cloud Engineer certified. Developed AICruit—an end-to-end AI resume evaluation platform featuring semantic matching, bias auditing, and explainable scoring.

TECHNICAL SKILLS

Programming: Python, SQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS

AI / ML: Supervised & Unsupervised Learning, NLP, Deep Learning

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, NLTK

Generative AI: LangChain, ChromaDB, Prompt Engineering, Gemini API, sentence-transformers

Cloud & Tools: Google Cloud Platform (GCP ACE), Git, VS Code, Jupyter Notebook

PROJECTS

AICruit – AI Resume Evaluation Platform | *Python, FastAPI, Gemini*

- Designed a dual-mode resume evaluation system (rule-based + LLM-augmented) to address inefficiencies in traditional ATS screening, exposing results via REST API endpoints built with FastAPI.
- Implemented semantic JD-resume matching via `all-MiniLM-L6-v2` and Gemini 2.5 Flash Lite, with explainable scoring across ATS readability, JD match, and resume structure dimensions.
- Built FAIRE-based bias detection endpoint and MongoDB audit logging; added LRU caching with SHA-256 keys and PII stripping middleware, reducing inference latency by approximately 60%.

• [GitHub Link](#)

SymptomChecker – Conversational Health Bot | *Python, LangChain, ChromaDB*

- Developed a conversational AI health assistant using LangChain chains and ChromaDB vector storage to analyse symptoms and surface relevant health conditions with source citations.
- Built contextual multi-turn dialogue with persistent symptom tracking using prompt engineering and retrieval-augmented generation (RAG) patterns.
- Designed a modular chain architecture separating retrieval, reasoning, and response layers, enabling seamless swap of underlying LLM and embedding models.

• [GitHub Link](#)

Social Media Sentiment Analysis | *Python, NLTK, Scikit-learn, NumPy, Pandas, TF-IDF*

- Built an end-to-end sentiment classification pipeline over 5K+ social media posts; used Pandas and NumPy for data wrangling and NLTK for preprocessing.
- Extracted features via TF-IDF and trained ML models achieving 72% accuracy; visualised polarity trends with Seaborn and Plotly.

EDUCATION

Vasireddy Venkatadri Institute of Technology

B.Tech in Artificial Intelligence and Data Science – 8.55/10

Sri Chaitanya Junior College

Physics, Chemistry, Mathematics – 93%

Nambur, Andhra Pradesh

Oct 2022 – Jun 2026

Guntur, Andhra Pradesh

Aug 2020 – Jul 2022

CERTIFICATIONS

Google Cloud Certified – Associate Cloud Engineer: Provisioned Compute Engine VMs, IAM roles, Cloud Storage, firewall rules, and Stackdriver monitoring.

Joy of Computing in Python – NPTEL: Python fundamentals, algorithms, and image processing through practical projects.

Microsoft Career Essentials – Generative AI: Prompt engineering with Bing AI and real-world GenAI application design.

ACHIEVEMENTS

Secured **Top 5** position in Guntur's first centralized 24-hour Ideathon for developing an AI-based speech analysis tool that evaluates speaking ability, provides real-time feedback, and generates performance scores.
