PROFILE SUMMARY

AI & Data graduate specializing in LLM pipelines, NLP systems, and cloud native ML infrastructure. Built AICRUIT, an AI resume evaluation platform using semantic matching, bias auditing, and explainable scoring, and Symptom Checker, a retrieval augmented conversational health assistant. Google Cloud Associate Cloud Engineer Certified

TECHNICAL SKILLS

Programming Languages: Python, SQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS

AI / ML: Supervised Learning, Unsupervised Learning, NLP, Deep Learning, AI-Native Development

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, NLTK

Generative AI: LangChain, ChromaDB, Prompt Engineering, Gemini API, sentence-transformers

Cloud & Tools: Google Cloud Platform (GCP ACE), Git, VS Code, Jupyter Notebook

EDUCATION

B.Tech in Artificial Intelligence and Data Science | 8.55/10

Jun 2026

Vasireddy Venkatadri Institute of Technology | Nambur, Andhra Pradesh

PROJECTS

AICruit – AI Resume Evaluation Platform

- Architected a **dual-mode resume evaluation system** (rule-based + LLM-augmented) to address ATS screening inefficiencies, exposing results via **FastAPI REST endpoints**.
- Integrated **semantic JD-resume matching** using **all-MiniLM-L6-v2** and **Gemini 2.5 Flash Lite**, with explainable scoring across ATS readability, JD match, and structure dimensions.
- Engineered **FAIRE-based bias detection** with MongoDB audit logging; applied **LRU caching** (SHA-256 keys) and PII stripping middleware, **reducing inference latency by ~60%**.
- [GitHub Link](#)

SymptomChecker – Conversational Health Bot

- Built a **conversational AI health assistant** using **LangChain** and **ChromaDB vector storage** to analyze symptoms and surface relevant conditions with source citations.
- Established **multi-turn dialogue** with persistent symptom tracking via **prompt engineering** and **retrieval-augmented generation (RAG)** patterns for contextual responses.
- Designed a **modular chain architecture** separating retrieval, reasoning, and response layers, enabling seamless swapping of underlying **LLM and embedding models**.
- [GitHub Link](#)

Social Media Sentiment Analysis

- Built an **end-to-end sentiment classification pipeline** over **5K+ social media posts** using Pandas, NumPy, and NLTK for data wrangling and text preprocessing.
- Extracted features via **TF-IDF vectorization** and trained ML models achieving **72% accuracy**; visualized polarity trends using Seaborn and Plotly.
- [GitHub Link](#)

CERTIFICATIONS

- Google Cloud Certified – Associate Cloud Engineer: Provisioned Compute Engine VMs, IAM roles, Cloud Storage, firewall rules, and Stackdriver monitoring.
- Joy of Computing in Python – NPTEL: Python fundamentals, algorithms, and image processing through practical projects.
- Microsoft Career Essentials – Generative AI: Prompt engineering with Bing AI and real-world GenAI application design.

ACHIEVEMENTS

- Secured a Top 5 position in Guntur's first centralized 24-hour Ideathon for developing an AI-based speech analysis tool that evaluates speaking ability, delivers real-time feedback, and generates performance scores.
